

Keep kids safe on wheels

Skateboard - Scooter - Bike - Skates

WEAR A HELMET

Use your head, wear a helmet. It is the most effective way to lower head injury and death from bike accidents.

Does your helmet fit properly?

1

Eyes

Put the helmet on your head. Look up. You should see the bottom rim of the helmet.

2

Ears

Make sure the strap forms a 'V' under your ears when buckled. The straps should be a little tight but comfortable when buckled.

3

Mouth

Open your mouth as wide as you can. Does the helmet hug your head? If not, tighten the straps.

DID YOU KNOW?

- Helmets can lower the risk of severe brain injuries by more than half.
- Helmets save lives, but less than half of children 14 and younger wear them.
